

Hancocks

LONDON
SINCE 1849

Hancocks is delighted to preview this exceptional platinum and diamond 'pirouette' pendant as its Jewel of the Month for December.

Centered with a beautiful and unusual 3.87 carat oval flat briolette diamond which spins freely to reveal the full beauty of its faceting, it is set throughout with rose-cut diamonds. The diamond is D colour – the highest colour grade attributed to a diamond and, as such, the most valuable.

Guy Burton, Director of Hancocks London, says: "This is a remarkable diamond and it needed an equally impressive design to show it off in all its glory. After hand-drawing a number of designs and discussing these with our master craftsman, we arrived on the 'pirouette' design. Inspired by one of ballet's most famous turns, it is playful, timeless and enables the diamond to truly dazzle.

"Diamonds like these do not often come on to the market so we are particularly delighted to offer this to our clients this month ahead of the Christmas gift-giving season."
